

Offline Status

- **Production Pass 2 in progress (SVX reco + new muon reco)**
 - 10% of the statistics processed last week, entered the pipelined mode of bug fixing. Looks like today we reached the level of about 1 crash/10 files, will proceed with the next iteration.
- **Preparations for Pass 3**
 - New: validation, Luc Demortier coordinating validation effort
 - Calibrations update? New used sets? - Rob Snihur is the contact person
- **Code management:**
 - 3.12.0 (tagged back on Jan 09) is out : used for Pass 2
 - 3.13.0(tagged on Monday) is out : will provide basis for the code development
- **Code development**
 - Working out more stable scheme of code development than we had before
 - On Monday met with D0 to hear about their approach (close to BaBar)
 - Much more discipline, much more people (librarians) really involved into the operations
 - D0 release the software weekly
 - D0 has 400 packages vs us having only 200+
 - Need to see what we can use from their experience

P.Murat, Commissioning Meeting

2/22/01

2

- **Compilers update:**

- Plan to move to KAI 4.0 as soon as we can
- KAI 4.0d released
 - Work on the licensing issues in progress

- **Offline shifts**

- Schedule on the web:
- http://www-cdf.fnal.gov/internal/upgrades/computing/operations/offline_shifts/offline_shifts.html
- People drain has stopped, at least temporarily
- Training program is worked on
- Shifts will start in March
